## **WHAT IS AN IN SHOP FULL REBUILD**

We completely tear down your carburetors, run them through two cleaners, check all orifices and ports to make sure they are clear and clean.

**ON CV CARBS:** We replace all gaskets, O-rings, throttle shaft screws, diaphragms, needle jets, jet needles, float needles, floats, clips and pivot pins.

**ON /2 CARBS:** We true the flanges, replace all gaskets, O-rings, Needle Jets, Jet Needles, Idle Jets, Main Jets, Idle Speed Springs, Idle Air Screws, Floats and Float Needles.

We set your carburetors to stock application unless you advise us otherwise due to altitude or engine modifications.

The In Shop Rebuild includes return shipping to you by UPS Ground inside the US and a copy of our Manual.

## **SHIPPING AND PAYMENT INSTRUCTIONS**

Drain all gas, pack your carburetors well and insure them for \$1,500.00. Include a cover letter with your name, address, telephone number, email address and a list of all work you want performed.

Tell us what engine they are on and if there have been any modifications to the engine. If the altitude you ride at the majority of the time is above 1,500 ft please give us your riding altitude.

You can include a check with your carburetors or we will call you once they are done for a Visa or MasterCard payment.

Note, if there are any stripped threads broken or missing parts not included in a normal Full Rebuild the repairs or parts will be extra.
